

# Metal Fabrication

## About the Department:

The work of the department started in the institution from 1986; it was basically the role of workshop women's groups. The idea of conducting workshop work in the meetings of women groups in the campus itself started. Through this activity we reached out to poor children from the surrounding villages and it was decided that by teaching them the task of welding fabrication, one can make them independent. Second, it can provide employment opportunities.

Third, through this work, we can protect the environment, so in 1986, for this, machines like welding drill machine, cutting machine were rough there and workshop started, gradually the size of this work was increased by training children. Thinking why women cannot do this work, women have been sent to teach meetings of women groups to teach the work of Tilonia, they were trained by the workshop and today they are running their own workshops by creating their own society.

**Our vision is to connect rural children with maximum training on welding fabric weighing machines to make them self-sufficient and a support system for their family**

At present, 5 employees work in the workshop, who are earning the expenses and income of the section by making various iron related items of the organization.

1. Rafiq Mohammad
2. Norat Mal
3. Sharif Mohammad
4. Imamudin
5. Saddam Hussein

# ACTIVITIES THIS YEAR

## Products Manufactured

- Panel stand
- Iron rod
- Wage charge
- Dining table frame
- Dining bench frame
- Cooler stand
- Tank cap
- Pot stand
- Forged frame
- Windows
- Street light pol
- Water Heaeter Tank

Revenue Generated: 2,763,005
